

12v lithium battery pack to 220

Overview

What is a 12V lithium ion battery pack?

A 12V lithium ion battery pack is a battery pack made up of three or four lithium batteries connected in series and several lithium batteries connected in parallel. This configuration allows the capacity of a 12V lithium battery to be customized.

What is a 220V inverter output socket?

The 220V inverter output socket is only used for household small electrical equipment within 350W. It may not start if it exceeds 350W. The battery inverter motherboard is a product independently developed by our company. It is compact and does not take up any space, and is closely packed with battery cells and BMS in a plastic box.

Can a 12V battery charger charge a secondary battery?

Make sure it is a 12V battery system. The maximum charging current provided by the DC to DC battery charger does not exceed the current allowed by the house battery (as secondary battery). If the input voltage is lower than the required output voltage, will it still charge?

Leaptrend 12V DC to DC charger works in supply voltage from 8V to 16V.
