

Adjustable regulated power supply portable

Overview

What is an adjustable / programmable power supply?

Using an adjustable / programmable power supply allows digital or analog control of the power supply output by a control system for maximum versatility. The control system can control and monitor the power supply output voltage and current from virtually anywhere there is an Ethernet connection.

What are adjustable DC power supplies?

Adjustable DC power supplies are capable of delivering a variable output voltage or current. These adjustable power supplies fall into three categories: locally adjustable power supplies, remotely adjustable power supplies, and programmable power supplies.

Which Acopian power supplies are fully adjustable?

All Acopian Wide Adjust Output power supplies are fully adjustable from 0V to full rated output voltage. This is regardless of whether you are using the internal potentiometers, remote analog programming, or remote digital programming. Acopian adjustable DC power supplies: Gold Box Infinity Linear Regulated Wide Adjust Output Power Supply.

What is a volteq adjustable power supply?

Volteq adjustable power supplies are known for their best-in-class noise and ripple performance. There are two main designs for regulated adjustable DC power supplies: Adjustable Linear Power Supply and Adjustable Switching Power Supply.

Do Acopian programmable power supplies have local adjustment pots?

All Acopian programmable power supplies have local adjustment pots mounted in the power supply (Gold Box Infinity use suffix C2). In the event of an interface failure, the operator can revert to manual control with the

addition of a simple jumper (s). What is the adjustment range of Acopian's wide adjust output power supplies?

.

What is the difference between adjustable linear and adjustable switching power supplies?

Adjustable Linear power supplies have exceptionally low ripple but tend to be heavy and less efficient, while adjustable switching power supplies have very high power efficiency, and good noise and ripple performance for most of applications. Currently we only make adjustable linear DC power supplies with output below 20A.
