

Are lithium batteries safe in Ireland

Overview

Unlike the UK, or mainland Europe Ireland has yet to introduce dedicated national regulations to tackle the growing risks associated with lithium-ion batteries, particularly in the e-bike sector. Are lithium-ion batteries safe in Ireland?

The reality is that even the most advanced, high-quality batteries can become hazardous if damaged, improperly stored, or handled without proper precautions. As technology outpaces legislation, businesses in Ireland must look beyond compliance and take a proactive approach to lithium-ion battery safety across the board.

Are lithium ion batteries safe?

Charging and battery safety Lithium-ion batteries or li-ion batteries (sometimes called LIBs) are the lightweight batteries that power e-scooters, e-bicycles and hoverboards. They are safe when they are used properly, but present a fire risk if they are over-charged, short-circuited, submerged in water or if they are damaged.

Are portable Li-ion batteries safe?

Given the relatively low quantity of waste batteries handled by distributors and the use of approved waste receptacles (e.g., WEEE Ireland battery boxes), the likelihood of a significant safety event due to the storage of small quantities of portable Li-ion batteries is considered low²⁷.

Are batteries safe in the EU?

Instead, the country relies on broader EU-level rules, such as the EU Battery Regulation (2023/1542), which sets out long-term requirements for sustainability, safety, and labelling across the bloc. But even that regulation is phased in gradually and was never designed to address the immediate fire risks posed by batteries in everyday use.
