

## **Does the indoor base station use a backup power supply**

## Overview

---

How does a battery backup system work during a power outage?

During a power outage, the battery system automatically kicks in, providing electricity to keep essential appliances and systems running. There are several types of home battery backup systems available, each with its own advantages and limitations. The three main types are lithium-ion, lead-acid, and flow batteries.

Could home battery backup systems be part of our energy future?

Home battery backup systems could be part of our energy future. Learn more about how they work, their cost, and what benefits they bring. Several years ago, Phil Robertston of Woodstock, Vermont signed up for a pilot program to install a Tesla home battery system called the Powerwall.

What is a home battery backup system?

Home battery backup systems are often installed in conjunction with solar panel systems. With this setup, you can increase your energy independence by storing excess solar energy generated during the day for use at night or during power outages.

What does a base hub do during a power outage?

During a power outage, the Base hub disconnects your home from the grid. This ensures that the stored energy in your battery powers only your household. Learn more about the components of your battery system below, in the section "What's inside your Base battery system." The average power outage in Texas lasts 2.5 hours.

Why do you need a battery backup system?

With a battery backup system, you can achieve a high degree of energy independence. This means less reliance on the grid and protection against rising electricity costs. Home battery backup systems are often installed in

conjunction with solar panel systems.

Do power stations have a power supply mode?

Additionally, some power stations come with a UPS (Uninterruptible Power Supply) mode. This feature automatically switches to battery power during blackouts, minimizing disruption and protecting sensitive equipment. Regular monitoring and alerts for battery health and charging status are essential as well.

## Does the indoor base station use a backup power supply
