

Energy-saving inverter price

Overview

A solar inverter costs \$2,000 on average, with prices ranging from \$800 to \$5,000 —though the overall price is wrapped up in your solar panel installation. The size of your system, the type of inverter, and the efficiency rating affect your final cost. What is the cost of a solar inverter?

A solar inverter is a critical component of every solar system and costs between \$1,000 and \$1,500 for a medium-sized installation. Our list of the best inverters highlights cost, size options, warranty, and efficiency levels. Ready to go solar?

Call 877-307-7668 to be connected with a solar expert today!.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

What is the most expensive solar inverter?

EnergySage data from the second half of 2024 shows that solar panel systems with this SolarEdge inverter cost \$2.90 per watt (that includes the inverter and solar panels), making the Home Hub the most expensive inverter on our list.

2. Best voltage performance: Tigo EI Inverter TSI-7.6.

What is solar inverter efficiency?

Efficiency measures how much solar energy your inverter transforms into electricity you can use. The majority of current inverters operate at 95-99% efficiency, but don't worry if the difference between models is only a few percentage points.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.
