

Factory price of local energy storage power supply in Spain

Overview

What is the market energy storage in Spain?

The market energy storage in Spain, particularly in relation to the BESS systems (Battery Energy Storage Systems), is undergoing a dynamic and accelerated evolution. This transformation is driven by the growing need to integrate renewable energy sources into the electricity grid, improve supply stability and optimize energy use.

What is a dynamic electricity tariff in Spain?

Spain is a European pioneer in dynamic electricity tariffs – plans where prices change every hour, based on wholesale rates. The most common dynamic option?

PVPC (Precio Voluntario para el Pequeño Consumidor) – the regulated hourly tariff used by $\sim\frac{1}{3}$ of households. In 2024, it was reformed to include futures prices, reducing volatility.

Does the capacity market guarantee the profitability of storage projects?

The capacity market is a mechanism designed to ensure the security of electricity supply, complementing revenues from generation, storage, and demand response. However, it should not be considered a tool to guarantee the profitability of storage projects.

How many MW of storage operative capacity?

870 MW of storage operative capacity. Plants with specific remuneration. 10-15 years of track record. Very early stage of implementation. Growing pipeline under development with wind and PV assets. Spanish suppliers entering the market. Positive impact on the access capacity auctions.

Factory price of local energy storage power supply in Spain

[Spain: Wholesale electricity market report](#)
