

# **Fiji s energy storage export companies**

## Overview

---

Why do businesses use solar energy in Fiji?

With on-site solar energy generation in Fiji, businesses can generate their own electricity and become less vulnerable to power outages, grid disruptions, and energy supply constraints. Many organisations in Fiji switch to solar energy as part of their commitment to sustainability and reducing their carbon footprint.

Is Fiji a good place to invest in energy?

Fiji, a tropical archipelago in the South Pacific, has a rapidly evolving energy sector that reflects the country's commitment to sustainability, economic development, and energy security. With ambitious goals and strategic initiatives, the energy landscape in Fiji presents compelling opportunities for investment and innovation.

What are the main sources of energy in Fiji?

The primary sources of energy include: **Hydropower:** A major contributor to Fiji's renewable energy capacity, hydropower accounts for approximately 50% of the country's electricity generation. **Fossil Fuels:** Diesel and other petroleum products remain significant, particularly for transportation and electricity generation in remote areas.

Who is Energy Fiji Limited?

Energy Fiji Limited is a company established in 1966 under the Electricity Act of 1966. It began operating from 1 August of that year and was previously known as the Fiji Electricity Authority.

What does Fiji export?

Fiji's exports include copra (dried coconut meat), ginger, and coconut oil, as well as bananas, rice, cereals and vegetables, pineapples and other tropical fruit.

What is the energy demand in Fiji?

The energy demand in Fiji is steadily increasing, driven by population growth, economic development, and a push toward industrialisation. Urban centres such as Suva and Nadi account for the majority of energy consumption, while rural areas often depend on decentralised and off-grid solutions.

## Fiji s energy storage export companies
