

Finland solar power home manufacturer

Overview

Who are the best solar energy companies in Finland?

Fortum: Electricity company. Turn key solar energy systems. Full service chain from site assessment to system delivery and warranties. Green Energy Finland Oy: Turn key solution provider for renewable energy systems. Helen Oy: Electricity company. Construction and operating solar PV-plants.

Is solar power a real thing in Finland?

Many Finns are already familiar with solar power: solar panels can be found on the roofs of many homes, summer cottages and workplaces. As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition.

Does Finland need wind power?

In addition to wind power, we also need plenty of solar energy, for which Finland has excellent prospects. Solar power is particularly well suited as a counterpart to wind power. These two emission-free energy sources complement each other: solar energy is available in summer and during the day, while the highest winds occur on average in winter.

How much solar power does Finland produce a year?

In southern Finland, the annual output of a 1,100 Wp solar power system at a 30–45-degree angle amounts to about 900 kWh per year. The total annual output in the southern parts of Finland is about the same as in northern Germany. Use our calculator to see your output potential. What does Wp and kWp mean?

.

Why should you partner with solar power Finland?

At Solar Power Finland, we offer a wide range of partnership opportunities

designed to provide maximum value for our collaborators. By partnering with us, organizations can gain increased visibility, connect with key industry players, and align their brand with the future of solar energy.

Why should you choose solar Finland?

Solar Finland and its subsidiaries with strong long-term background are experts in all aspects of solar energy. Our extensive know-how and experience of over 40 years make it possible to develop in different areas making our products and services competitive in the solar energy markets both domestically and abroad.
