

Four companies involved in the Norwegian wind solar and energy storage project

Overview

What projects are under development in Norway?

Another project under development in Norway is a new power plant at Torolmen, in the Årdal municipality, with an estimated annual production of around 30 GWh. The total investment for this project could reach NOK290 million (US\$27.4 million), with potential construction starting as early as 2027.

Who is Norsk renewables?

Norsk Renewables AS, formerly called Norsk Solar, is a vertically integrated independent power producer with a commercial offering that includes solar, wind, and storage. We are passionate about the clean energy transition, and we proudly focus on markets where we can significantly impact CO2 reduction, and enable sustainable growth.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. “There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It’s the key to turning intermittent wind and solar into a stable energy source,” explains Pål Runde, Head of Battery Norway.

Who are Norway's Big Three battery cell companies?

A few years ago, Norway’s big three battery cell companies – Beyonder, FREYR Battery and Morrow Batteries – were only promising, high-tech blueprints. “Now these large projects are mature. They are talking to potential clients.

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world’s first electric fast ferry. In

a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

Is Yane a viable project in Norway?

The company noted that the profitability of the Øyane project is more challenging, and it is currently evaluating its viability. Another project under development in Norway is a new power plant at Torolmen, in the Årdal municipality, with an estimated annual production of around 30 GWh.
