

Homemade solar power generator

Overview

Since I love building things, I enjoyed every step of the way, even the trial-and-error part. But since you may not have time to waste, I've made this step-by-step guide. Read on and learn how to make a DIY portable solar generator yourself.

To distribute power in my homemade solar generator, I used a 6-circuit fuse panel for the positives, and for the grounds, I used a busbar. Fix both of.

To wire the LED light, you need to shorten the cable just enough to reach the switch. Strip the outer insulation on the end, as well as the insulation.

Take the leads from the 18V socket and connect the charge controller. Now go ahead and connect the charge controller to the fuse box and negative bus bar. Since I used a solar battery maintainer that has its own solar panel on the top of the lid, I just.
