

How much does the UK export PV panels

Overview

How much can you get paid for exporting solar panels?

The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year. Looking at the latest available offers in April 2025, we found that:.

What is the highest export tariff for solar panels?

The highest export tariff currently on offer is the Solar Savings Exclusive tariff from Good Energy, which pays 40p/kWh; however, it's only available to customers who have bought both solar panels and a battery from Good Energy Solar or JPS Renewables. More on: The Smart Export Guarantee explained.

How much do you get paid by a solar export tariff?

How much you'll get paid by a solar export tariff primarily depends on two main factors: how many kilowatt-hours (kWh) of electricity you send to the grid, and the rate you sign up to, which will be measured in pence per kWh. A typical UK household can earn £345 per year from exporting their excess solar electricity.

Do solar panels have to pay for excess energy?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

.
