

Huawei PV Inverter 250-330

Overview

Where can I find a model of a sun2000 inverter?

You can obtain the inverter model from the model label on the external package and the nameplate on the side of the enclosure. The nameplate figure is for reference only. The SUN2000 is a three-phase grid-tied PV string inverter that converts the DC power generated by PV strings into AC power and feeds the power into the power grid.

How do you harden the ground under a Huawei inverter?

Issue 07 (2023-06-30) Copyright © Huawei Technologies Co., Ltd. If the inverter is installed in a place with abundant vegetation, in addition to routine weeding, harden the ground underneath the inverter using cement or gravel (recommended area: 3 m x 2.5 m). Issue 07 (2023-06-30) Copyright © Huawei Technologies Co., Ltd.

Can sun2000 inverters be connected to the same winding?

The SUN2000-250KTL-H1, SUN2000-250KTL-H3, SUN2000-280KTL-H0, SUN2000-300KTL-H0, SUN2000-330KTL-H1, and SUN2000-330KTL-H2 inverters described in this document cannot be connected to the same winding of the transformer station together with other models of inverters. The SUN2000 supports IT power grids.

Why is sun2000 a bad inverter?

The clearance around the SUN2000 may become insufficient for reasons such as rotation axis change. The energy yield of the inverter may decrease if heat cannot be effectively dissipated. Issue 13 (2024-06-30) Copyright © Huawei Technologies Co., Ltd.

How do you connect a PV inverter?

Connect the connectors on the PV strings to the connectors on the inverter, and pull back the connectors on the PV strings along the axial direction to

check whether the connectors are securely installed. Ensure that the connectors are properly connected. Any connector damage due to improper connection is not covered by the warranty.

How do I turn off a sun2000 inverter?

If the SUN2000 status is Shutdown: Command, choose Maintenance > Inverter ON/OFF on the home screen and send a startup command. ----End Issue 13
