

Install 600W solar panels

Overview

This system is a barebone type of system meant to get power going with 600 watts of power and a budget under \$2000. There are different downfalls to this system that can be improved with a higher budget and would be recommended if a higher budget is possible. Contact me through the contacts if you have.

This project isn't difficult if you follow along with this step-by-step tutorial. I'll rate this project on a 1 thru 10 scale based on skills you may have. 1 is so easy you can do it in your sleep 10 being you should get professional help. 1. If you're an electrician or work in the.

The exact situation for this project is retrofitting solar to an old mobile home that was originally set up for A/C power connected to a public utility grid. Here is an easy Solar System Calculator for you to figure out how large your solar system needs to be. One of.
