

# **Italian power generation equipment container**

## Overview

---

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

How many Eurogen power generating sets are there?

12 Eurogen Power generating sets in continuous operation for the local users of the islands. Our technical support is always available for timely interventions and repairs, remote control, remote support and plant maintenance. Generating sets manufacturing: for over 40 years, we have been designing generating sets for emergency and self-production.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What generating sets does Eurogen offer?

Generating sets for ordinary or reserve power. Generators powered by natural methane and biogas. 12 Eurogen Power generating sets in continuous

operation for the local users of the islands. Our technical support is always available for timely interventions and repairs, remote control, remote support and plant maintenance.

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to +40°C. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.
