

Outdoor AC power supply

Overview

What are AC power supplies?

These power supplies are designed to accommodate a wide range of ac sources while supplying the same output. Typical supplies can accept input voltages of between 85 and 264 volts. This makes it easy for customers to use the equipment directly on the ac mains regardless of whether it is 100, or 200 volts range.

What products are included in a power supply system?

This includes hardened outdoor enclosures, uninterruptible power supply (UPS) modules, specialty batteries, accessories and generators that can be custom integrated to meet your application.

What is a ses AC/DC outdoor UPS?

The SES AC/DC Outdoor UPS™ system enclosure is powder coated white for cooler summer operation, and includes Goretex battery breather vents. Our systems produce clean, uninterrupted power for critical AC and/or DC loads. In the event of AC (utility) power loss, the UPS-AC/DC Outdoor supplies back-up power for 24-48 hours, or longer if requested.

What types of AC systems are available?

AC systems are available in 120 VAC configurations. Each compact battery charging system assembly features automatic boost/float temperature compensated charging, a low voltage disconnect and programmable alarm contacts. AC systems feature an industrial quality pure-sine DC to AC inverter for AC loads.
