

Outdoor Battery Cabinet Energy Storage BMS Solution

Overview

What is BMS battery management system?

The BMS battery management system manages the battery status in a Tesla vehicle. Its quality directly affects the performance of the battery and the entire vehicle system. The main task of the BMS system is to detect and ensure battery safety.

What is a 3 level battery management system (BMS)?

Our 3-level battery management system (BMS) guarantees safe operation by continuously monitoring all critical parameters at three distinct levels: the cell level, battery module level, and battery cabinet level. Additionally, the HISbatt 215-A features an independent aerosol-based active fire suppression system.

Why should you use a battery energy storage system?

Shave offload peaks for your commercial or industrial business with reliable battery energy storage systems. Store excess energy from your solar panels to increase PV self-consumption and decrease dependence on the expensive grid for an efficient power storage system.

Does his-energy offer a turnkey battery storage solution?

At HIS-Energy our aim is to deliver our clients with fully integrated turnkey battery storage solutions. HISbatt 215-A comes with an integrated cooling system (HVAC), a fire suppression system, and a power inverter installed with the safest LFP battery cells.

What is his-energy's premium Battery Cabinet?

HIS-Energy's Premium Battery Cabinet Solution: Engineered for Both Outdoor (IP54 Rated) and Indoor Installations. From peak shaving and emergency power supply to powering EV charging stations, our smart HIS- EMS seamlessly manages your energy needs.

Are the battery cabinets modular?

Whether you're planning an on-grid project or an off-grid solution, the battery cabinets are designed to be modular and easily expandable in the future. We've designed our solutions to guarantee safety and comfortability for you. All our battery solutions are forklift-ready and can be easily installed at the site.
