

Photovoltaic panel roof installation company

Overview

Can a roof support solar panels?

But, here's what else needs to happen: Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.

Can I get a new roof and a home solar system?

Get a new roof and a new home solar system, and know your roof and home solar system will be protected with Sunnova. Our home solar and Sunnova SunSafe® home solar + battery storage systems come with a 25-year warranty. You will work with a single company who will coordinate your roof and home solar installation.

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.

Can you install solar panels on a new roof?

Roofing work: After the panels are safely removed, roofing work can proceed as it would on any roof without solar panels. It's important to ensure that the new roof is compatible with solar panel reinstallation. Panel reinstallation: Once the roof work is complete, the solar panels need to be reinstalled.

Does Sunnova offer solar & roof payments?

Monitor your solar production and battery charge, manage your billing options, and more. You can install a new durable roof and a state-of-the-art home solar system with a single company. We also offer roofing with our Sunnova SunSafe® home solar + battery storage system. Will my solar and roof payments to Sunnova be separate?

No.

How do you replace a solar panel on a roof?

For homeowners who already have solar panels installed but need to replace their roof, the process involves a few additional steps: Contact the solar panel installer: They will need to remove the panels and mounting hardware before roof work can begin. Coordination with the solar installer is crucial to ensure minimal downtime for the solar system.
