

Power 37kw solar inverter

Overview

What is a 37kw/50hp solar pump inverter?

37kW / 50 hp solar pump inverter, supports both DC (from 450VDC to 750VDC) and AC power (380v, 400v, 480v) inputs solar pump controller, in-built MPPT with high efficiency, adjust the output frequency in real time according to changes in sunlight intensity.

What is a solar pump inverter?

Inexpensive 37 kW solar pump inverter / VFD, invert the DC supply of the solar panel to three-phase alternating current, auto adjust AC motor speed and water flow. Solar pump inverter adopts advanced MPPT control technology, real-time detection of solar panels power voltage, tracking the highest voltage and current, efficiency is as high as 98%.

Can a 35kW solar array be put on an inverter?

A 35kW solar array can be put with an inverter with an AC output of 26.25kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.

What is a 36kw inverter?

The 36kW is an extension of the existing 23kW and 28kW inverter line and features a dual MPPT design with up to 98.6% conversion efficiency and wide operating window of 240-950Vdc. An installer friendly and integrated wire box simplifies installation and reduces BoS costs.
