

Quick installation of photovoltaic solar panels

Overview

How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: – Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

How do you activate a solar system after installation?

After solar panel installation, the system needs to be activated. This involves interconnecting the solar panels, installing the inverter, and commissioning the system. During this step, note that as long as the solar panels are receiving sunlight, they have an open circuit voltage. Be careful when handling them.

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine if your roof is suitable for solar panels. Start by researching qualified, insured installers online or ask for recommendations from people who have gone solar. Comparison-shop by asking multiple installers to come assess your roof.

How long does it take to install solar panels?

For residential solar projects, the physical installation of the panels and other

PV components usually takes one to three days, depending on the system's size, location, and complexity.

What should I know before installing a solar panel?

Use our solar panel installation guide for ensuring the safety of yourself and others throughout the installation process. Solar equipment can cause cuts, scrapes, lacerations, gouges, and puncture wounds. Use the proper equipment and remember to take breaks to avoid getting fatigued. Wear eye protection, gloves, and closed-toe boots at all times.
