

Saudi Arabia containerized power generation

Overview

Does Saudi Arabia need a natural gas power plant?

Saudi Arabia seeks to increase its electricity generation capacity from natural gas and renewable energy sources as part of the country's Vision 2030.³ The Saudi Power Procurement Company (SPPC) awarded bids for four natural gas-fired power plant projects in October 2023 and began receiving bids for four additional projects in January 2024.

Will Saudi Arabia become a sustainable electricity sector?

While renewable energy is expected to play a pivotal role in Saudi Arabia's transition to a sustainable electricity sector, solar power in particular has potential due to the Kingdom's abundant sunlight and other favorable geographical conditions. Several large-scale solar projects are already in various stages of development.

How much will Saudi Arabia spend on energy projects in 2021?

Speaking in 2021, the Saudi government expects to spend \$293 billion on power and energy projects by then. The biggest share of this revenue is expected to be spent on transmission upgrades and renewable energy. The implementation of the world's largest battery energy system (BESS) project progresses as Saudi Arabia begins qualification tenders.

What is Saudi Arabia's battery storage program?

The projects mark the first phase of Saudi Arabia's ambitious battery storage program. It is designed to support its 50% renewable energy goal by 2030. Each 500 MW facility will operate for four hours, providing 2,000 MWh of total power capacity, said the SPPC.

How much electricity does Saudi Arabia generate?

Saudi Arabia generated an estimated 453 terawatt-hours (TWh) of electricity in 2023, with 62% from natural gas, 38% from oil, and less than 1% from

renewables. Natural gas-fired electricity generation increased 8% year over year, from 260 TWh in 2022 to 280 TWh in 2023.

Can strategic planning and investment transform Saudi Arabia's electricity grid?

A new integrated assessment modelling study highlights the importance of strategic planning and investment in transforming Saudi Arabia's electricity grid.

Saudi Arabia containerized power generation

Total electricity generation from all sources in TWh in Saudi Arabia

In Saudi Arabia, the total electricity generation from all sources in twh currently stands at 454.6TWh, reflecting an increase of 25.4TWh (5.9%) compared to 2023.
