

# **Small PV Energy Storage Project in Cape Verde**

## Overview

---

This is a remote locality in Cape Verde's Santo Antão island, known for its challenging terrain and geographic isolation and previously faced energy access issues. That project features a renewable energy system, including solar power installations and energy storage solutions. Why does Cape Verde need a solar project?

Project is located in Santa Maria on the island of Sal. This is why the completion of the solar installation also highlights Cape Verde's desire to strengthen its renewable energy capacity. Tourism is among the leading sectors in many countries, meaning that it is vital for energy consumption not to lead to carbon footprints.

What is the largest solar power plant in Cape Verde?

Largest solar power plant in Cape Verde on Sal Island was inaugurated by Cape Verde's Ministry of Energy and Commerce that will help the country to save energy. This is true given that Aguas de Ponta Preta developed a 5 MW solar plant in Santa Maria that is quite significant to the country's renewable energy plan.

What will Cape Verde's new solar plant do?

The new solar plant will make Cape Verde one of the leading nations in the use of renewable energy within the region thus laying the foundation for what could be a more sustainable form of energy besides the traditional dependence on fossils. Read also Mtentu Bridge: Africa's Tallest and Longest Cantilever Bridge.

When will Cape Verde's energy project be completed?

Completion date: September 2024. Significance: The project supports Cape Verde's efforts to lower carbon emissions, a critical issue for an island nation vulnerable to climate change. For more than 30% of electricity generation, Cape Verde has targeted it for the year 2026 while for more than 50% has set a target for the year 2030.

## What is the Cape Verde Climate Project?

Location: Santa Maria on the island of Sal. Completion date: September 2024.

Significance: The project supports Cape Verde's efforts to lower carbon emissions, a critical issue for an island nation vulnerable to climate change.

## Small PV Energy Storage Project in Cape Verde

---

Integrating desalination and energy systems like this could be highly beneficial. For example, on the island of S& #227;o Vicente it could enable wind turbines to meet up to 84% of the island's ...
