

UAE Industrial Energy Storage Vehicle

Overview

Why is UAE partnering with a global electric vehicle industry?

The collaboration aligns with the UAE's national strategies, including Operation 300Bn, UAE Industry 4.0, and the Net Zero by 2050 initiative. By leveraging local innovation and manufacturing, the partnership aims to bolster the UAE's position in the global electric vehicle market and contribute to the country's industrial growth.).

Does enercap have a manufacturing facility in Dubai?

Additionally, Enercap Energy Holding Limited has agreed to acquire an existing manufacturing facility in Dubai Industrial City (DIC), which will be upgraded to 6GWh/year capacity. Enercap has a current global demand of over 30GWH of large-scale battery energy storage systems (BESS).

Where are enercap energy storage systems made?

Enercap's energy storage systems are designed, developed and manufactured in the UAE. ROX's collaboration with Enercap will enable an advanced nonchemical supercapacitor-based energy storage to be applied to the ROX vehicle range.

What is the energy storage joint venture & how will it work?

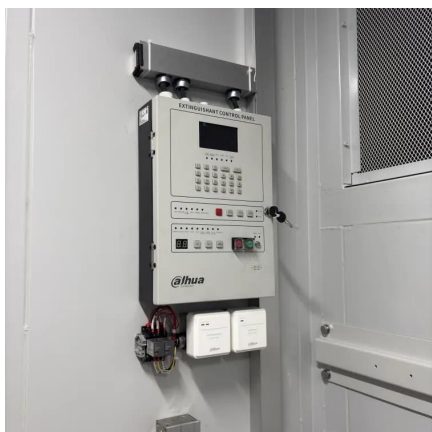

The joint venture is set to meet exponential growth in demand, which has been stimulated in recent years by the onset of energy storage being used with renewable energy, to balance the grid, electric vehicle manufacturing and power management optimisation and backup requirements for industries such as data centres.

Why should you invest in the UAE?

The human capital and infrastructure available in the UAE is unmatched in the region and provides the foundation for the continuous development of innovative technologies and products.

UAE Industrial Energy Storage Vehicle

Role of Energy Storage

In addition to utility-scale projects, the commercial and industrial sectors of Dubai, Abu Dhabi, and Northern Emirates are actively incorporating battery energy storage systems into their operations.
