## Overview

---

Monthly deployment of all solar photovoltaic capacity in the United Kingdom.

The UK has witnessed significant solar PV adoption over the past decade, with government data showing a total of 15.8 GW solar capacity distributed across 1,468,652 installations as of February 2024. The figures show a significant increase of 874 MW or 5.9% since February 2023. How many solar PV installations are there in the UK?

The total installed solar photovoltaic capacity across all constituencies in the UK is 5,024.3 MW. 1,404,409 domestic solar PV installations across the UK contribute to this figure. South Cambridgeshire has the highest installed capacity, at 27.6 MW, but Torridge and West Devon follow closely, with 23.1 MW each.

How have domestic solar installations increased across UK constituencies?

The total installed solar photovoltaic capacity across all constituencies in the UK is 5,024.3 MW. 1,404,409 domestic solar PV installations across the UK contribute to this figure.

Where are solar panels installed in the UK?

The UK's largest solar farm is Shotwick Solar Park in Flintshire, Wales. A commercial solar panel costs approximately £50,000 for a small to medium business. The county of Cornwall is home to 8,000 solar sites and is considered the solar county. Approximately a million UK homes have solar panels. 61,000 homes had solar panels installed in 2021.

What has the UK's solar photovoltaic capacity been like in 2024?

Recently released statistics from the Department for Energy Security and Net Zero (DENZ) show that, in August 2024, the UK's solar photovoltaic capacity surpassed an astonishing 16GW. But what has this progress looked like over the last 14 years?

Did domestic installations increase steadily, or was there a significant boom in solar adoption?

How many solar panels are there in the UK?

As of February 2024 a total of 1.468,612 million homes (4.6%) now have solar panels across the UK. In 2023 191,524 solar panel systems were installed. Which is more than in any time since 2015, (when Feed In Tariffs subsidies were high). Anglesey has the most solar panel systems in the UK.

How much do solar panels cost in the UK?

In terms of regions, the South-East has the highest number of installations. Thanks to decreasing solar panel costs, homeowners can expect a payback period of 6 to 8 years. Studies show that solar panels are increasing UK property prices by up to 25%. Solar panels cost roughly £9,076 for the average house.
