

Which has more 5G base stations in Cape Verde or communications

Overview

Does the Cape Verde Islands have 4G?

On the Cape Verde Islands, you can expect widespread coverage. In most areas, a 4G network is available, ensuring fast and efficient internet connectivity. Where 4G is not available, the 3G network provides reliable service, ensuring you are rarely out of touch.

What telecommunications services are available in Cabo Verde?

The two main telecommunications providers in Cabo Verde are Alou (formerly CV Móvel) and Unitel T+. They offer excellent coverage across the islands, ensuring that travellers can enjoy quality internet connections, even in the more distant locations. Internet access can be obtained via mobile data, Wi-Fi, and fixed broadband.

Does Cape Verde have a good internet connection?

Cape Verde is lagging behind in the expansion of broadband internet connections. Around 74 percent of all residents have access to the internet. Around 7 percent have their own fast internet connection, which is at least faster than the former ISDN (more than 256 kbit/s).

What percentage of Cape Verde residents have broadband?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. Cape Verde is lagging behind in the expansion of broadband internet connections. Around 74 percent of all residents have access to the internet.

How fast is broadband Internet in Cape Verde?

With an average download speed of 19.83 Mbit/second for fixed-network broadband internet, Cape Verde ranks 133rd in an international comparison. The upload rate was only 12.02 Mbit/second (127th place). The Speedtest Global Index published regularly by Ookla is based on several million

individual measurements in February 2025 from 154 countries.

How much does Cape Verde spend on mobile telephony?

However, this is already quite a high consumption in a worldwide comparison. If one does not take a fixed amount in US dollars, but converts it to the economic output per inhabitant, a user in Cape Verde spends 2.1% of his income on mobile telephony. Worldwide, this rate is around 5.3 percent.
