

Which outdoor wind power base station companies are there in Taipei

Overview

Does Taiwan have an offshore wind farm?

The first offshore wind farm in Taiwan, Formosa 1, has officially moved into the operation and maintenance (O&M) period since 2020, kick-starting Taiwan's nascent O&M industry. As an emerging offshore wind market, Taiwan's local O&M supply chain is still in its infancy, which presents significant development opportunities.

Who are the leading WTG suppliers in Taiwan offshore wind industry?

Siemens Gamesa Renewable Energy (SGRE) and Vestas are leading WTG suppliers in Taiwan offshore wind industry. Below content focuses on their business activities in Taiwan and the capabilities of their local partners regarding the components.

What is Taiwan's offshore wind strategy?

As the world shifts towards renewable energy, the Taiwan government has developed a national strategy to guide offshore wind development, seeking to install 5.6GW offshore wind capacity by 2025 through three phases, namely the Demonstration Incentive Program, Potential Sites, and Zonal Development.

Is Taiwan a good place to invest in offshore wind power?

Taiwan offshore wind power remains tapped due to supply chain issues in the country. However, increasing investments and efforts to deploy offshore wind turbines by the government and international companies is expected to provide a significant opportunity for the market.

Which ports in Taiwan support offshore wind?

In Taiwan, the Taipei Port, Taichung Port and Kaohsiung Xingda Port are positioned as major base ports for offshore wind. However, to accommodate the rapid expansion of offshore wind, the Kaohsiung Port and Anping Port in

Tainan have also expanded their business to support the offshore wind industry.

Is Taiwan ready for offshore wind?

Taiwan is at an early stage of offshore wind development. On the policy front, the Government announced the Four-year Wind Power Promotion Plan in 2017, setting a target of 5.6GW of installed offshore wind capacity by 2025. The Government also plans to allocate 1.5GW capacity each year, for a total of 15 GW for 2026 to 2035.
